

COMPACT OR FAST? ENJOY BOTH!

SE730 External Solid State Drive

SE730 External Solid State Drive

The SE730 is quite simply the most compact external SSD currently available. But this doesn't mean it's not big on performance, featuring USB 3.1 Gen 2 connectivity and up to 500MB/s read and write. The SE730 uses premium MLC Flash for long-lasting durability, and a convenient reversible USB Type-C connector. Compatible with Windows, Mac OS, and Android, it's perfect for cross-device content sharing. On top of being super elegant, the SE730 is also very rugged. It meets IP68 water and dust proof requirements and military-spec shock proofing for peace of mind wherever you go. Light and compact, it easily fits in one hand and is effortless to carry whether you're working, traveling, gaming, or otherwise enjoying life.

Faster than ever

The SE730 brings USB 3.1 Gen 2 speeds, racing up to 500MB/s in read and write. That means a 5GB file, which is a typical full HD movie, takes just 16 sec to transfer. That's four times faster than the average external hard drive.

The new convenient standard: USB Type-C

When using external drives you just want to access and enjoy content, not waste time trying to guess which side of the connector is up or down. With USB Type-C, the SE730 plugs in right away every time.

Mighty IP68 and military-grade shock proofing

SE730 carries official IP68 qualifications: it offers complete protection against dust and particulates, and continues operating normally even when submerged in 1.5m of water for 60 minutes. In addition, the SE730 is MIL-STD-810G 516.6 shock proof certified to virtually eliminate the risk of impact damage.

Your light, convenient, and stylish companion

The SE730 is so compact you can put it in a sandwich bag or a small pocket. You won't even notice it, since it weighs just 33g. We've made the SE730 using premium materials, including a gorgeous textured metallic exterior. This isn't just a super fast and compact external SSD, it's also a luxurious accessory that'll make you proud.

Features

- Read/write speed up to 500MB/s
- IP68 dustproof and waterproof
- Military-grade shockproof
- Slim and light design

Specifications

- Interface: USB 3.1 Gen 2 Type-C
- Capacity: 250GB
- Color: Gold, Red
- Dimensions (L x W x H):
72.7 x 44 x 12.2mm (2.8 x 1.7 x 0.4in)
- Weight: 33g (1.1oz)
- Warranty: 3 years
