

Highlights

Share Mobile Broadband

Share a 3G HSPA+ connection with multiple Wi-Fi devices such as smartphones, tablets, PCs, video game systems and more

Protect Your Network

A built-in firewall protects against attacks over the Internet, and industry-standard WPA/WPA2 security prevents unauthorized access to your network

Share Internet Anywhere

The DWR-720 is small enough to fit in your pocket and has a high-capacity rechargeable battery that lets you work online for longer

DWR-720

Mobile Wi-Fi Hotspot 21 Mbps

Features

Connectivity

- USIM card slot for connection to mobile Internet services
- 802.11 b/g certified, and compatible with 802.11n devices
- microSD card slot allows you to add storage
- Micro-USB port for easy charging

Portability

- Up to five hours of battery life in one charge gives you true mobile connectivity
- Small size lets you drop it in a purse or pocket and take it wherever you go

Security

- WPA/WPA2 Wi-Fi security protocols provide the latest in wireless security
- Built-in firewall keeps unwanted connections out
- Wi-Fi Protected Setup (WPS) for one-touch secure setup with other devices

Compatibility

- Works with different OS platforms including MacOS, Windows, and Linux

D-Link's DWR-720 Mobile Wi-Fi Hotspot 21 Mbps uses your mobile 3G Internet connection to give you a simple and fast Wi-Fi network anywhere you need one. Instead of being confined to one Internet-connected device through a USB dongle, the DWR-720 allows you to create and share Wi-Fi hotspots anywhere you have a 3G signal. The compact size means you can conveniently take it with you and share your connection anywhere; use it in a cafe to send e-mails while your friend reads the news, or have your laptop, phone, and tablet all connected to the Internet at the same time using just one mobile Internet service.

Connect and Share Your 3G Connection

Simply insert your data-enabled SIM card and the DWR-720 will allow you to share your 3G mobile Internet wirelessly. Get all your mobile devices connected to the Internet or share a 3G Internet connection with family, friends or colleagues when you are out and about. The DWR-720 also allows you to access files on your microSD card with the built in microSD card slot³. Share holiday pictures with your family and friends, or documents and presentations with your colleagues on a business trip by simply connecting the DWR-730 to a computer through USB. The Mobile Wi-Fi Hotspot 21 Mbps lets you connect with others and share what's important to you while you're on the go.

Portable and Secure

This router is small enough to fit in your pocket whilst the built-in rechargeable battery means that you can take it anywhere with you and surf the Internet. If you need to recharge it, you can do so easily with any USB wall or car charger.

The Mobile Wi-Fi Hotspot 21 Mbps may be small but it can keep your wireless connection as secure as if you were connected through your home network. Its built-in firewall prevents potential attacks and hacking attempts from the Internet, and with WPA2 encryption, you can be sure that you are sharing your 3G connection only with the users you want to.
