BLUETOOTH HEADSET FOR MOBILE DEVICES

EASY TO USE
Pair it easily with any Bluetooth device. A single user-friendly button lets you turn the headset on/off, initiate pairing, and control your calls without having to touch your phone. Depending on your preference, you can easily remove or flip the EarHook™ to fit either ear.

CONNECT TO 2 DEVICES SIMULTANEOUSLY
Connect to two separate devices at the same time. When one of them rings, the headset will automatically stream the right call when you answer. If a new call comes through on the other phone, you'll get an alert and the option to pick it up.

CLEAR CALLS
Get crystal-clear calls on both ends of the line. Omni-directional mic transmits your voice while reducing background noise, so that the other party hears you clearly.
