3. Conditions of use

The mentioned products are suitable for cold drink applications. Please avoid a contact with temperatures above 40°C, also for storage time.

4. Additional declaration of conformity

- heavy metals according to the packaging directive 94/62/EU
- substances posing a risk to the ozone layer

5. Summary

There are no objections to using the products for commodities as defined by EU regulation (EG) No. 1935/2004 and §§30 and 31 of LFGB (German Regulations for commodities for food contact applications), Federal Law Gazette No. 63 dated 17 Sept. 1997.

This confirmation is valid for the goods furnished by the supplier. Responsibility to check whether the packing material is suited for the contents and purpose intended is with the user, i.e. the packing material supplier cannot be held liable for any quality-related changes to the foodstuff which might result from interaction with/migration of substances of the packing material or components of it. It has to be pointed out that, in case of printed packing material, the printing ink must not get into contact with foodstuff.

Yours faithfully,

Signature of
Supplier
